

## GLAST Calorimeter

# MSU Beam Test '98 - He Beam

Paris Cal Mtg.  
14-16 Feb 2000

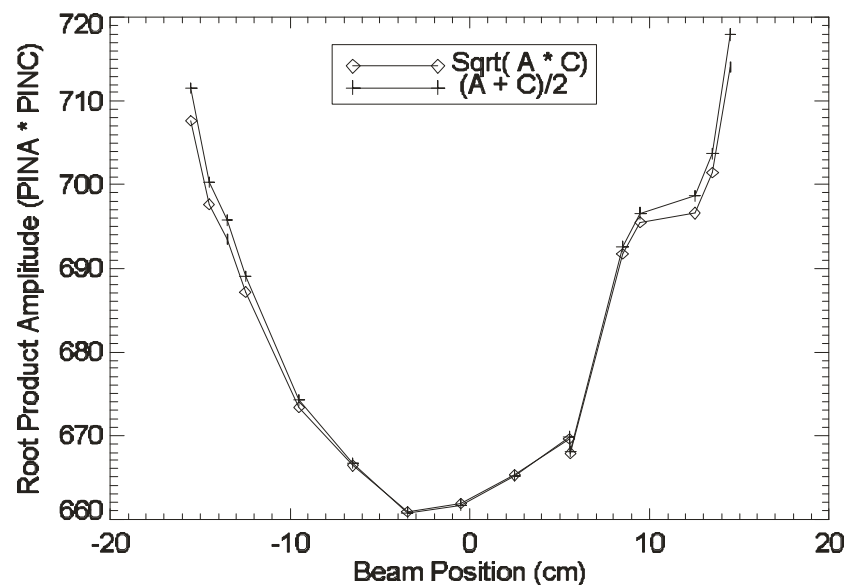

*Each End of CsI Block*

Light amplitude seen at each end of the 32 cm CsI block as a function of position.

He Beam: 160 MeV/nuc  
Energy Deposition: ~150 MeV

*Sum of Ends of CsI Block*

Sum of signals from both ends of the 32 cm CsI block as a function of position.

Variation with position:  $\pm 4\%$
